THURSDAY, OCTOBER 28. 1742.

Yesterday arriv'd a Mail from France.

Extrait of a Private Letter from Paris, Nov. 3.

HAVE no other News to write you at present than this, That our Propositions of Peace having been rejected every-where, it has been resolv'd to carry on the War with Vigour for another Year; and in order to this, a new and every way extraordinary Scheme has been thought of; viz. To employ the Army of M. Maillebois to force a Passage in the Spring from Bavaria thro' Tyrol into Italy, at the same Time that the Spaniards under Don Philip make a like Attempt to penetrate thro' Savoy and Piedmont. This, it is thought, will embarass the Court of Vienna as much or more than the War in Bohemia, and will at the same time alarm the Great Duke to the highest Degree. We can scarce imagine that both these Attempts should fail, especially when it is considered that Marshal Maillebois will have Time to recruit his Army in Bavaria, to collect the scatter'd Remains of M. Broglie's Troops from Bohemia, and to receive some Reinforcements from hence. It will likewise afford the Spaniards Leisure to march their Supplies into Dauphiny, and thereby augment Don Philip's Army to 35,000 Men. It is likewise consider'd as another very great Advantage, that by this Means the Spaniards in Italy will have a fresh Opportunity given them of acting, or at least of saving themselves, which they cannot otherwise expect. Add to all this, that if Things should succeed to our Wish, his Sicilian Majesty may, perhaps, be prevailed on to renounce his Neutrality; especially if it be true which is reported here, that a certain Foreign Minister at his Court has declar'd to him, That the sending any Auxiliaries to the Spanish Army will be consider'd as a Breach of that Neutrality. We talk likewise here of another new Scheme for raising Money, which as yet is not made publick; but a Report is spread, that it turns principally on the voiding certain Farms of Publick Revenues, and letting them afresh. The new Minister, Cardinal Tencin, meets every Day with fresh Difficulties; and tho' he is a Person of infinite Vivity, and has a Head very fertile in Expedients, yet he finds himself at present so much embarrassed, that he inclines, or at least seems to incline, to part with his new Employment, and retire to his Diocese. It is certain there is a strong Party formed in favour of Mr. Chauvelin, who give out that he has a Genius suitable to the Times, bold, enterprizing, and, generally speaking lucky; others incline to the Duke de Noailles, who is both a Statesman and a Soldier, a Man as much in the good Graces of the People as in Favour with the Court; which has, however, been of no long Standing, and perhaps a more effectual Method could not be taken to make him lose it, than to raise him to so envied a Post as that of Prime Minister.

The Paris Almanac contains nothing material.

Dublin, Oct. 19. Yesterday a Proclamation was issued by their Excellencies the Lords Justices, for the Observation of a solemn Fast on the 10th of November next.

His Majesty having been pleased to signify his Royal Pleasure for augmenting the Dragoon Regiments in this Kingdom, by the Addition of one Adjutant to each Regiment, one Serjeant, one Corporal, one Drummer, and twenty private Men to each Troop; his Majesty has appointed Thomas Kynard, Gent. to be Adjutant to Lord Moleworth's Dragoons, Edw. Clayton, Gent. to be Adjutant to Col. Brown's Regiment, and Edward Osborn, Gent. to be Adjutant to Col. Rose's Regiment.

His Majesty has been pleased to appoint Daniel Tomkins, Esq; to be Captain of a Troop in Major General Bowles's Regiment of Horse, in the room of John Arabin, Esq; preferred; and Andrew Derussat, Gent. to be Surgeon to Col. Richbell's Regiment of Foot.

Their Excellencies the Lords Justices have appointed Blachford Wynne, Gent. to be Barrack-master of Mullingar, Phillipstown, and Tullamore.

Sunday last three of the Chester Traders arriv'd here, who brought with them a great Number of Recruits, for the two new-raised Regiments in this Kingdom.

Our Accounts from Whitehaven are very melancholly, relating to the late Storms. A new Pier which was begun this Summer, on which a large Sum of Money has been expended, was wash'd down by the Violence of the Sea. The Ship Globe was driven to the Northward,

as was a Vessel belonging to Workington, and both were lost, &c.

Newcastle, Oct. 23. On Saturday Night Mr. Adam Bird, of North Shields, returning home from this Place, was attack'd on the Road, about two Miles out of Town, by a Person on Foot, who seizing hold of his Horse's Bridle, and at the same time presenting a Pistol to his Breast, demanded his Money. Mr. Bird, not startled in the least at this unexpected and strange Salute, ask'd him, if he was in earnest? The Villain answer'd, with a G—d—n his B—d, he was; and if he did not immediately deliver, he'd blow his Brains out. He had no sooner got the Words out of his Mouth, than Mr. Bird gave him so hearty a Stroke over the Head with the But-end of his Whip, that it knock'd him down. Here a sad Misfortune had like to have happened, for in the Fall the Pistol went off; but it providentially did no Execution, the Ball only grazing his Ear. Mr. Bird hereupon dismounted, but being lame of one of his Feet, occasioned by an Anchor of 15 or 16 Hundredweight falling on it only the Week before, was not quick enough to secure the Rogue, who, having recover'd himself, had got over the Hedge into the Fields, and so escaped.

Dr. BATEMAN's Original and ONLY TRUE Wholesale and Retail WAREHOUSE at the Printing-Office, facing the South Door of Bow-Church, the Lower End of the Church-Yard, from Cheapside, LONDON.

**T**HE Daily Success which has constantly attended the Taking Dr. BATEMAN's PECTORAL DROPS, in the several Distempers of Colds, Congers, Pains in the Breast, Limbs, and Joints; has gain'd them so universal a Character, that few Families care to be without them in their Houses. — Besides the Distempers above-mentioned, there is no one Medicine, since the Discovery of the Art of Physick, that will give a Speedier Relief and Ease in all Rheumatick Pains, Gout, Stone, Gravel, Cholick, Fluxes, &c. Innumerable Instances might be given of the Happy Effects thereof, but we choose to refer to a Book, call'd, *A Short Treatise of the Virtues of Dr. BATEMAN's Pectoral Drops*, given *Gratis*, at the Warehouse above-said; where all Shop keepers, &c. in any City, Town, or Village, where these Drops are not already Sold, may be supplied, with good Allowance to sell again, by Directing or Sending to the PENTER,

BENJAMIN O'KELL,  
W.M. and CLERK DICEY.

The Surprising Encouragement, which by constant Success, these most Valuable Drops have, for upwards of Twenty Years, met with, not only in Great Britain and Ireland, but in all Parts of the West-Indies, and other Foreign Countries; has lately induced several mean and mercenary Pretenders to Counterfeits them; and by imitating our Seal, Bill of Directions, and Show Boards, with our Method of Advertising, as near as they can or dare to do, without making them the same; thereby impose their dangerous Compositions upon the unwary and credulous Shop-keepers both in Town and Country, for the True and Genuine Sort.

The PATENTER and Company therefore, in Gratitude for the universal good Reception they have so long met with, and for the Safety of those who for the future may be desirous of using the same, think themselves absolutely obliged to give this necessary Caution;

Which they earnestly request may be observed,

THAT the Bottle they Buy is not only Sealed with the Boar's Head, but has also these Words round it, BY THE KING'S PATENT, as in the Margin; and also that the Names of the PATENTER, Ben. O'Kell, William and Clerk Dicey, be in the Bill of Directions given with each Bottle; without which you may be assur'd it is a notorious Counterfeit, and may be of the most dangerous Consequence.

N. B. That these Draps are also Sold Retail (as well as Wholesale) at the Warehouse aforesaid, at One Shilling the Bottle, containing three Dozen.

This Day is publish'd,  
(Price Five Shillings.)

**THE ELEMENTS OF ALGEBRA**, in a New and Easy Method; with their Use and Application, in the Solution of a great Variety of Arithmetical and Geometrical Questions, by General and Universal Rules. To which is prefix'd, An Introduction containing a succinct History of this Science.

By Mr. NATHANIEL HAMMOND, of the Bank.

Extract from the Account of this Book in the Works of the Learned.

The World has long complained of the Want of a proper Introduction to Algebra. Some are so very concise, as if they were contrived not to teach but introduce a Teacher; others again are larger, but wrote with so little Consideration to the Understandings of such as are altogether unacquainted with the Science, that they are of very little Use to those who are most inclined to make use of them. Whence it comes to pass, that few find it practicable to make any Progress in Algebra without a Master, tho' certainly the Science in itself is far from surpassing a clear Head, and a tolerable Understanding.

The Design of this Treatise, which is of a reasonable Bulk, and which contains nothing which is not solid, and to the Purpose, is to assist such as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; so that their Scholars may find Employment in their Absence; and to enable such as live in Country-Places, and must consequently want all other Tutors, except Books, to acquire such a Skill in this Science, as may enable them to spend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiry after Truth habitual.

The Treatise begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation used therein. The Author then proceeds to the several Rules, explaining them carefully and copiously in all their various Cases; so that with a moderate Attention it is simply impossible for a Person, who desires to be Master of Algebra, to miss of his End.

We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become necessary: He professes to have imitated the judicious Euclid in this Respect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is usually the most fatiguing Part of the Science, viz. The Doctrine of Surds, in the Manner in which it is usually taught. By the same Means he leads his Reader directly to Equations; and, by shewing him the Profit he is to reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a strong and rational Foundation, he moves more slowly through the rest of his Work, that whoever follows him, may be obliged to become Master of every Branch of the Art, so as to be a compleat Algebraist, before he quits his Book, and not a Smatterer.

Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable Newton, are here so clearly explained, and their several Cases so plainly set down, and so thoroughly explicated, that it may be truly said, there are no where else such Instructions to be met with. At the Close of the Book, we find abundance of Observations, necessary for enlightening such Minds as are willing to proceed still farther in analytic Discoveries; so that considering the Completeness of this Work, and that too is very moderate, it is as complete as possibly can be expected: And he who is thoroughly versed in it, will find no great Difficulties, when he proceeds to sublimer Studies. The Language is plain and natural, the Book is more copious than any other in Examples, and the Illustrations of them are so full and clear, that it is impossible to mistake their Meaning.
